Summary

MERN Stack Developer building fast, scalable, and user-friendly web applications with React.js on the frontend and Node.js, Express.js, and MongoDB on the backend. Hands-on experience designing and developing RESTful APIs, implementing JWT-based authentication, designing MongoDB schemas, and handling full CRUD workflows — backed by modern tools like Vite, Firebase, Git and Github for efficient, collaborative, and agile development.

Education

Bachelor of Science in Software Engineering, Gomal University

10/2021 – 07/2025

- Academic Focus: Web Development, Software Design
- CGPA: 3.32/4.0

Skills

Languages

HTML, CSS, JavaScript (ES6+)

Frameworks / Libraries

React.js, Bootstrap, Node.js, Express.js, Mongoose

Tools & Platforms

VS Code, GitHub, Chrome DevTools, Postman, npm

Additional Skills

Responsive Web Design, Version Control, Cross-Browser Compatibility, Debugging, REST API Integration, CRUD Operations, Authentication (JWT)

Projects

iNotebook – MERN stack Notes Application 📄, Developed MERN stack note-taking application with secure authentication and full CRUD operations for managing notes.

Technologies: React.js, Bootstrap, Node.js, Express.js, MongoDB Atlas, JWT.

- Implemented JWT-based authentication and protected routes
- Built RESTful APIs for full CRUD functionality (Add, Update, Delete, Fetch Notes)
- Integrated MongoDB Atlas as a cloud database
- Managed frontend state using React Hooks
- Configured environment variables for secure production setup
- Used Git and GitHub for version control.
- Live Demo: <https://i-notebook.vercel.app/login> 📄
- GitHub Repository: <https://github.com/waleed666-max/iNotebook.git> 📄

Daily News Hub 📄, React-based news platform delivering real-time headlines across multiple categories

Technologies: React.js, JavaScript ES6+, [NewsAPI.org](https://newsapi.org/) 📄, React Router, Bootstrap.

- Engineered a sleek, React-powered news platform aggregating real-time headlines across diverse categories via [NewsAPI.org](https://newsapi.org/) 📄
- Delivered seamless, single-page navigation experience using React Router for instant category switching
- Crafted a polished, fully responsive UI with custom CSS, ensuring a consistent look across all devices
- Live Demo: <https://daily-news-hub-xi.vercel.app/general> 📄
- GitHub: <https://github.com/waleed666-max/Daily-News-Hub.git> 📄

FoodNest [🔗](#), Responsive Food Delivery Website

Technologies: HTML5, CSS3, JavaScript

- Built a fully responsive, mobile-first food delivery website using Flexbox and Grid
- Designed interactive navigation with smooth scrolling and a custom JavaScript.
- Showcased 8+ menu items across optimized sections with clean UI.
- Integrated a functional contact form with validation for real-time customer inquiries
- Live Demo:<https://foodnest-website.vercel.app/> [🔗](#)
- Git Hub:<https://github.com/waleed666-max/Foodnest-website.git> [🔗](#)

SkyCast [🔗](#), Real-Time Weather Forecast App

Technologies: React.js, JavaScript, CSS, OpenWeatherMap API

- Built a React-based weather app fetching live forecasts and conditions via OpenWeatherMap API
- Implemented dynamic city search allowing users to instantly check weather for any location
- Designed a clean, responsive UI displaying real-time temperature, conditions, and forecast data
- Live Demo:<https://skycast-weather-app-ecru.vercel.app/> [🔗](#)
- Git Hub:<https://github.com/waleed666-max/skycast-weather-app.git> [🔗](#)

Personal Portfolio Website, MERN & Firebase-Powered Developer Portfolio with Admin Dashboard

Technologies: React.js (Vite), JavaScript, CSS3, Firebase

- Built a fast, fully responsive portfolio website using React with Vite, featuring a unique Milky Way / space-inspired design
- Developed a separate admin dashboard connected to Firebase, enabling real-time updates to projects, tech stacks, and content without touching code
- Integrated a contact form using Web3Forms API, enabling visitors to send messages directly.
- Implemented dynamic project cards with tech stack highlights, live demo links, and GitHub repository links
- Leveraged Vite's fast build tooling for optimized performance and smooth cross-device experience

Courses

Meta Blended Frontend Developer Training (2025), NAVTTC

09/2025

- Completed a 3-month intensive frontend development program on Meta platform, focusing on HTML, CSS, Bootstrap, JavaScript, and React.js.
- Gained hands-on experience in building responsive and interactive web applications, implementing best practices, and using GitHub for version control and collaborative development.

Certificates

Coursera Meta Front-End Developer Professional Certificate 11/ 2025 [🔗](#)

A 9-course professional program covering front-end development fundamentals — including HTML, CSS, JavaScript, React, UX/UI design principles, version control, and coding interview preparation.

- Verify: <https://coursera.org/verify/professional-cert/YULW3VAI8ERE> [🔗](#)

Web Development — NAVTTC (Prime Minister's IT Training Program)

A government-certified program delivered under the National Vocational & Technical Training Commission (NAVTTC), building strong foundations in web development.
